OUAHIBA AHMID

DevOps Engineer — Cloud — Infrastructure — Automation

+213-659-190-740 | ahmidouahiba@gmail.com | LinkedIn | GitHub | Algeria

Professional Summary

DevOps and Infrastructure Engineer experienced in production support, Linux, containerized applications, monitoring, automation, cloud, and data platforms. Hands-on with Docker, Linux, Bash, Python, Git/GitHub, GCP, Prometheus, Grafana, Airflow, Prefect, PostgreSQL, and Apache Spark. Experienced in L2/L3 support, incident management, troubleshooting, deployment support, and log analysis, resolving 40+ tickets monthly with 93% SLA compliance. Strong telecom and networking foundation across infrastructure, cloud, data, and MLOps.

Core Skills

DevOps: Docker, Linux, Bash, Git, GitHub, CI/CD, Deployment, Infrastructure Support
Cloud: GCP, Azure, IBM Cloud
Monitoring: Prometheus, Grafana, Kibana, KPI Monitoring, Log Analysis, Alerting
Automation: Python, Bash, Shell Scripting, REST APIs
Data: PostgreSQL, MySQL, MongoDB, Redis, Apache Spark, PySpark, ETL
Orchestration: Apache Airflow, Prefect
Networking: TCP/IP, OSI, VLANs, Routing & Switching, 2G, 3G, LTE
Operations: L2/L3 Support, Incident Management, Troubleshooting, RCA, ITIL

Professional Experience

DevOps Engineer — Full Time, Remote Oct. 2024 – Jun. 2026
Seamless SDS *Sweden*

- Supported production environments, resolving 40+ L2/L3 tickets monthly with 93% SLA compliance.
- Supported Docker workloads and deployment workflows using Linux and Bash.
- Maintained production monitoring with Prometheus, Grafana, and Kibana.
- Investigated incidents using logs, KPIs, troubleshooting, and root-cause analysis.
- Supported Spark/PySpark ETL workloads and PostgreSQL, MongoDB, and Redis systems.
- Supported Airflow and Prefect workflows and developed Python/Bash automation.
- Used Git/GitHub, Jira, Slack, and Confluence for development and operations.

NOC Engineer — Full Time, On Site Jul. 2024 – Sep. 2024
Huawei *Algeria*

- Monitored multi-vendor telecom infrastructure using NetAct, ENM, U2020, and NetNumen.
- Investigated incidents using ServiceNow, Remedy, and Jira across Nokia, Ericsson, Huawei, and ZTE environments.
- Applied ITIL, SOPs, MOPs, impact analysis, escalation, and change-management procedures.
- Monitored KPIs and logs, performed Shell troubleshooting, and created reports using Excel, Power BI, and Kibana.

Base Station Subsystem Engineer — Internship Feb. 2023 – Mar. 2023
Mobilis URM *Setif, Algeria*

- Supported telecom infrastructure installation, maintenance, monitoring, and troubleshooting.
- Analyzed 2G/3G/4G traffic and performance indicators and supported network upgrades.

Optical Fiber & Transmission Engineer — Internship Jul. 2022 – Aug. 2022
Algerie Telecom – Optical Fiber & Amplification Center *El Oued, Algeria*

- Worked with optical fiber, microwave, transmission, multiplexing, splicing, and termination.

Transmission Engineer — Internship Jun. 2021 – Jul. 2021
Algerie Telecom – Amplification Center *El Oued, Algeria*

- Supported telecom infrastructure maintenance, UPS monitoring, battery testing, and troubleshooting.

Selected Projects

Production-Oriented MLOps Pipeline | *Python, Docker, PostgreSQL, Scikit-learn, Git*

- Built a production-oriented ML pipeline using the Olist dataset to predict late deliveries.
- Developed reproducible Python/SQL data preparation and feature-engineering workflows and containerized components with Docker.

Data Infrastructure & Analytics Platform | *Python, PostgreSQL, Docker, Spark, ETL*

- Built reusable ETL and data-processing workflows using Python, SQL, PostgreSQL, Apache Spark, Docker, and Git.

Data Analysis & BI Tool | *React, TypeScript, ECharts, JSON, Zod*

- Co-developed reusable dashboard components with JSON validation and dynamic Apache ECharts visualizations.

Education

State Engineer in Digital Technologies and Telecommunications
Higher School of Telecommunication and ICT (ENSTTIC) *Oran, Algeria*

Certifications

Oracle Cloud Infrastructure Foundations Associate – Oracle — Google IT Support Professional Certificate – Coursera
Docker Training – KodeKloud — Google Cloud Computing Foundations – Google
AWS Educate: Introduction to Cloud 101 – AWS Educate

Technical Tools

DevOps: Docker, Git, GitHub, Linux, Bash, CI/CD
Cloud: GCP, Azure, IBM Cloud
Monitoring: Prometheus, Grafana, Kibana
Data: Spark, PySpark, Pandas, PostgreSQL, MySQL, MongoDB, Redis
Networking: Wireshark, Packet Tracer, PuTTY, NetAct, ENM, U2020, NetNumen
Development: Python, Node.js, Express.js
Tools: Jira, Confluence, ServiceNow, Remedy

Languages

Arabic: Native **English**: Professional **French**: Moderate
